

Mobile Health is looking for a front-end specialist who can help our development team with web front-end technical design using Angular, CSS structure and integrating proprietary cross-platform custom theming into our Angular app.

The estimated duration of this project 2-3 months

Mobile Health has quickly become one of the largest and fastest growing digital healthcare SaaS platforms in the US.

Our goal is to provide help employers make a culture of health simple

We have millions of users and hundreds of employers on our platform working to improve their health, fitness and to reduce health care costs.

Why join Mobile Health?

- We work with great technology (Amazon Web Services cloud infrastructure, Python, Django, mobile apps)
- We have an amazing team (experienced, creative people, collaborative environment, lots of important work to do)
- We have an incredible product (growing healthcare space, happy customers)
- We make a real difference for our customers (and their employees)
- We are fast growing and profitable.
- We are self-funded and have no bank or investor financing
- We offer Industry competitive compensation and benefits

Mission

Mobile Health quickly and easily provides healthcare technology and programs to create a seamless wellbeing journey for employees and employer.

Skills and Qualifications:

The ideal person will have the following experience:

- Front End Web development
- Designing Angular applications from scratch
- Designing UI components from ground up (rather than just using the existing Material components)
- CSS architecture with respect to best practices in Angular, including experience with Shadow DOM and laying out dynamic content.
