

Mobile Health—Technical Lead—Work from anywhere in the U.S.

Mobile Health is looking for a Technical Lead to help us continue on our mission to change the Healthcare System.

Mobile Health has quickly become one of the largest and fastest growing digital healthcare SaaS platforms in the US. Our goal is to help our customers make a culture of health simple.

Mobile Health provides communications, incentives, tools, and real-time analytics that individuals and employers can use to improve workforce health, and overall wellbeing for employees and their families. We have millions of users and hundreds of employers on our platform working to improve their health, fitness and reduce their health care costs.

Why join Mobile Health?

- We work with great technology
- We have an amazing team (experienced, creative people, collaborative environment)
- We have an incredible product (growing healthcare space)
- We make a real difference for our customers (and their employees' lives)
- We offer industry competitive compensation and benefits

Job Description

- Responsible for working collaboratively with Mobile Health account managers and clients to develop efficient and effective solutions for clients based on unique requirements and match them with Mobile Health functionality
- Configure unique solutions and MH programs to meet the needs of our clients
- Manipulate graphic images for display in mobile and web technologies
- Help to develop test plans and conduct system testing to ensure high quality deliverables
- Implement solutions using the Mobile Health Consumer platform and supplemental tools including html, CSS and Django
- Streamline, enhance and optimize client implementation by identifying and implementing scalable processes, procedures and tools

- Contribute feedback to the product and engineering teams for suggested enhancements to the product line based on personal experience with using the product and tools designed to configure it
- Collaborate with team members from various parts of the organization for ongoing enhancement and optimization of processes, procedures and tools
- Works with Personal Health Information; is responsible for taking training and following defined procedures

Skills and Qualifications

- BS degree in Computer Science, Software Engineering or related discipline preferred
- 2-5 years of professional experience in an IT role
- Strong IT problem solving skills
- Experience with web page design and implementation
- Experience with mobile technology and apps
- Proactive and flexible in response to changing priorities in a client-centric, fast-paced, dynamic environment while meeting deadlines and exceeding customer expectations
- Self-motivated and able to master new technologies and concepts via hands-on learning
- Disciplined and able to work remotely from your home
